- Stimulates collagen production and tissue remodelling
- Safe for all skin types
- Gentle, less invasive skin ablation
- Less downtime
- Can treat face and body

# AAC DERMAlift Before & After

▪ CRYO WORK HAND

The cool handle provides methods for narcotic which use before Microneedle RF treatment

▪ SRF & MRF WORK HAND

Microneedle of 25pin, 49pin and 81pin replaceable

Specifications:

# AAC DERMALift

Reduce acne scars, fine lines & wrinkles and rejuvenate the skin

CRYO + MRF + SRF  
Microneedle fractional RF + MRF  
Superficial fractional RF + SRF

## AAC DERMALift

### Non-Surgical Advanced Micro-Needling / RF platform

The dynamic combination stimulates tissue remodelling and triggers the production of collagen. By repairing, remodelling, and resurfacing the skin at a cellular level, DERMALift can improve a litany of common skin blemishes, including fine lines and wrinkles, skin laxity, hyperpigmentation, skin tone and texture, stretch marks, cystic acne, and acne scars.

AAC DERMALift Fractional RF micro needling improves and skin's firmness and elasticity. by and gets rid of any textural irregularities. During the procedure, very thin micro-needles are inserted into the skin at varying depths. Radio waves emitted through the needles heat the tissues gently and without overheating the cells. As the surface skin remains protected from the heat energy, there is no risk of any pigment change or damage. Get non-surgical Face and Eye Lifting, wrinkle reduction, stretch marks treatment, scar removal and skin tightening with this amazing technology. Our device comes with specific parameters and specifications. There are different types of durable and biocompatible needles with varying depths.

AAC DERMALift uses Precise Depth of matrix 0.3mm, 0.5mm, 0.8mm for eyes , 0.5mm, 1.0, 1.5, 2.0 for face , 1.5mm, 2.0mm, 2.5mm, 3.0mm for body Three treatment head sizes – small = 25 needles, medium = 49 needles, large = 81 needles.

AAC DERMALift also designed a cooling devise to use before treatment to reduce the skin at a low temperature paralysis state, which can effectively reduce the stinging sensation. If the cool therapy is also used after treatment it will cause soothing the skin and reduce swelling.

The automatic output controlling and sterilized disposable needle tip make the procedure safe and secure. The treatment is entirely painless and one can resume their daily activity on the day after the treatment. Any feeling of discomfort disappears once the needles are withdrawn. Results are shown from one off treatment but to get maximum results 3+ treatments can be recommended
